

# Kushi Environmental Pledge

Climate change is becoming more and more apparent in the world around us, and it is something that I have been wanting to make more of an effort about. So, effective immediately I pledge to make the following changes within the business.

I pledge to;

- Donate a proportion of all class profits to Trees for Life, who are a Scottish organisation helping to rewild and replant native species of trees in the Scottish Highlands.
- Where possible, take the business paperless.
- Reduce the use of single use plastic, and where possible recycle and reuse everything.

I will continue to evaluate this pledge and make changes to improve the business' environmental efforts, and help reduce the effects of climate change.
